

Association of Women Surgeons (AWS)

The aim of the AWS chapter at RVU-SU is to inspire and enable female students who are interested in surgery (or similar) for the opportunity to network, find mentors, and improve peer relations to develop professional and personal goals. The AWS club is an organization that educates, informs, and empowers all future surgeons, especially underrepresented groups. We strive to provide educational activities aimed at introducing and improving skills and techniques necessary for the future.
