

Global Medicine Outreach (GMO Club)

The Global Medical Outreach Club (GMO Club) at RVUCOM is established in recognition and support of global health outreach programs and efforts to provide healthcare to underserved people worldwide. This club arranges speakers, events, and programs for students to explore areas of medicine that they ordinarily would not have the ability to access in their university training. This includes service to medically underserved communities abroad, as well as within the United States. It promotes exposure to diverse ethnic and cultural groups and fosters cultural sensitivity and advocacy for vulnerable populations. GMO Club offers insight to student physicians looking to participate in various medical missions.
