Preceptor Evaluation of Student

Preceptors evaluate student performance during each clinical experience using the student evaluation form. The final evaluation will be factored into the final course grade. Each syllabus describes how the evaluation factors into the final course grade assignment. Preceptor evaluations of students are currently housed through the clinical education management software (currently Exxat). Prior to the end of the rotation, students should coordinate with their preceptor to go through the evaluation to elicit feedback on their performance and to ensure the evaluation is completed. It is the student's responsibility to ensure the preceptor turns in the evaluation, given the grade is partially determined by the evaluation.
