

OSHA - Biosafety, Universal Precautions, and Bloodborne Pathogens

All students must complete a basic training course in biosafety, as required by the Occupational Safety and Health Administration (OSHA). Because patient contact and/or hands-on learning is a required part of the RVU curriculum, all RVU students must complete OSHA training annually. The avenue chosen for completion of this training is the Collaborative Institutional Training Initiative (CITI) online program.

Instructions for registering and logging onto the CITI website, and specific instructions on which courses are required, are provided annually by the Compliance Office.
