

BMS 5010 : Journal Club

The course aims to provide MSBS students the opportunity to evaluate and investigate evidence through critically reading, interpreting, and presenting primary literature for peers, RVUCOM students, and faculty. This course helps students stay abreast of current knowledge in the field, develop presentation skills, and create solutions to real-world issues through applying knowledge from the biomedical sciences. Topics will include advances across biomedical research and inter-professional teamwork. Emphasis is placed on developing presentation and teaching skills and in communicating scientific studies in seminar. The format of the course includes: 1) an introduction to and guided research of issues from national health initiatives (NIH, CDC, HHS and/or HRSA); 2) critical appraisal and formal presentation of biomedical research.

Credits 2

Prerequisites

None
