

MED 3020 : Critical Reflection and Professional Career Development I

This one-week elective provides students with the skills to critically reflect on their experiences in clinical education. Issues such as resiliency and coping skills, dealing with mistakes, identifying bias, value exploration, broadening one's professional identity, and preparing a personal statement. The course is a blend of virtual synchronous discussions and asynchronous personal exploration and reflection.

Credits 1

Prerequisites

Successful completion of all pre-clinical (Year 1 and Year 2) coursework.
