

OST 4010 : Advanced OPP Clinical Integration I

This course builds upon the foundation of the principles and philosophies of osteopathic medicine established during the first three years of OPP courses. This course will teach students how to apply osteopathic techniques to treat specific patient presentations and disease processes. The format will include modules that review the integration of osteopathic principles and practices into the general practice of medicine. Each module will consist of an online PowerPoint presentation, pertinent osteopathic manipulative techniques, and a five-question quiz.

Credits 1

Prerequisites

Successful completion of all pre-clinical (Year 1 and Year 2) coursework and passing score on COMLEX Level 1
